CLINICAL ACTIVITIES

Clinical Focus

My clinical focus is on breast surgical oncology and the comprehensive multidisciplinary care of the patient with breast cancer. Particularly in patients with aggressive types such as triple negative breast cancer and the highly aggressive and rare subtype of metaplastic carcinoma which has been the focus of my recent research. I also have an interest in male breast cancer and other rare breast cancer types including radiation-induced angiosarcoma. I also enjoy health literacy and improving the patient experience and education regarding breast cancer diagnosis and treatment through quality improvement.

EDUCATIONAL ACTIVITIES

Educational Focus

My educational focus is on surgical quality improvement. As the national co-chair of the surgical quality initiative committee for the American College of Osteopathic Surgeons (ACOS), I led the committee in a 4-hour curriculum on surgical quality approved by the American Osteopathic Association (AOA) in February 2025 to offer maintenance of board certification credit for all board-certified osteopathic general surgeons in the United States. Additionally, as program director for our Breast Surgical Oncology fellowship, I take a strong role in mentoring and training our trainees including our fellow and general surgery residents and producing quality clinical research.
